

Everything You Need to Remember

AI Science

LLMs predict tokens, not truth. Hallucinations are built-in. Math is text, not calculation. Context fades in the middle. Always verify.

Copilot Power

M365 Copilot = GPT-4 + YOUR data. Meetings, emails, docs — all AI-assisted. The "/" command is your secret weapon for context.

Prompt Engineering

CRISP: Context, Role, Intent, Scope, Preference. 5 min on prompting saves 30 min on iterations. Be specific, not vague.

Every Team Benefits

CAE, Design, Homologation, ADAS, SW Dev, Tools — every discipline saves 5-10 hrs/week on docs, communication, and repetitive tasks.

Safety First

Describe patterns, never upload IP. AI helps you WRITE faster — YOU are responsible for CORRECTNESS. The assessor asks YOU, not AI.

Start Today

Try ONE technique this week. Create ONE reusable prompt. Track time saved. Share success. AI is a co-pilot — you're still the pilot.

"AI won't replace automotive engineers. But engineers who use AI will replace those who don't."

Start small. Stay curious. Share success. Protect Nissan IP always.
